IN BRITISH HISTORY

IMMIGRATION BETRAYAL

THE Tory election manifesto promised that: "there will be no further large scale permanent immigration." Within just over two years the Tory Government was letting in between twenty and a hundred thousand East African Asians from Uganda, despite an offer from India to take all those of Indian extraction.

Throughout the entire period of the Tory Administration East African Asians from Kenya have been flowing into Britain in a steady stream.

If not the root cause of many of our difficulties there can be no doubt that immigration is the greatest single aggravating factor with regard to both our housing shortage and the overcrowding in our schools.

The longterm prospects are even more frightening. Immigrant minorities are becoming more and more aggressive in spite of having been given preferential treatment. Future victims of racial violence must lay the blame on our present Tory M.P.s for being the men who were quite openly more concerned about any other people in the world than our own.

Common Market Treason

WITH regard to the Common Market the Tory election manifesto stated: "Our sole commitment is to negotiate; no more, no less." Heath himself stated: "Nor would it be in the interest of the Community that its enlargement should take place except with the full-hearted consent of the Parliaments and peoples of the new member countries."

Despite duress on M.P.s and a massive Government and Big Business financed propaganda campaign, the Tories only achieved a bare majority in Parliament and never achieved the support of the people.

THE PRESENT Conservative Government was elected in June 1970 on the strength of the policies contained in its manifesto *A Better Tomorrow: The Conservative programme for the next 5 years*. Subsequent events have shown that this was nothing but a collection of calculated lies aimed at bringing the Party to power. The policies actually implemented have been quite different and have brought this country nearer to the brink of national disaster than it has ever been before.

In the past many people voted for the Tory Party because they genuinely believed it was patriotic. That mistaken idea must surely have been swept away by the record of the present Administration. The Conservative Government has been a failure simply because it is not patriotic. Far from serving the interests of the British people it has actively collaborated with forces seeking our actual destruction, whether they be in the form of international Big Business or the I.R.A. murder gang.

Anti-Inflation farce

SINCE June 1970 there has been at least a 38% rise in the general cost of living and a 46.2% increase in the price of food. This is partly due to the Common Market and partly due to our dependence on the vagaries of international trade. Regardless of these factors, however, there would still be inflation for the simple reason that it is an inherent and thus inevitable product of our existing financial system.

When most people think of 'money' the idea of notes and coins immediately springs to mind. The overwhelming amount of money, however, is created by the banks out of nothing and issued in the form of loans that must be repaid at interest.

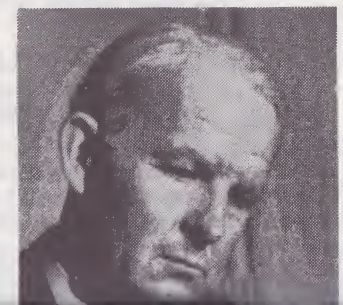

This fraudulent racket burdens us with an ever-increasing spiral of interest bearing debt. Against the background of a constantly depreciating currency that this causes individual groups of workers are forced to go on strike for higher wages merely to maintain their existing standards of living.

Ulster: Loyalists sold out

THE Tory manifesto said: "We reaffirm that no change will be made in the constitutional status of Northern Ireland without the free consent of the Parliament of Northern Ireland." In the event Stormont was suspended and replaced with the dictatorship of White-law's unelected Commission. The Tory Establishment in Ulster has subsequently jettisoned the mainstream of the Loyalist population and formed an alliance with Irish Republican elements.

Last month's Sunningdale Conference was, as we suspected, a major step towards eventual total betrayal. The tri-partite gathering

Until a British Government is willing to overcome the powerful vested interests at stake and tackle the cause of inflation at its roots we face a future of continuing industrial disputes.

It is quite clear that the present Government has neither the wit nor the will to put things right, and has instead found a scapegoat in the form of the Trades Unions. By attacking the just demands of workers for pay increases the Tory Government is effectively trying to deal with a mere symptom of a disease for which it is itself responsible.

The laughably entitled 'Anti Inflation Act' does, of course, represent a complete reversal of the Tories' declared policy. In their

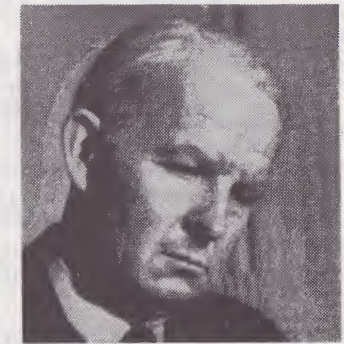

Another wage protest

election manifesto they said: "Labour's compulsory wage control was a failure and we will not repeat it."

Despite Government suppression of wage claims prices continue to rise. In December, for example, Rowntree were permitted to charge an average of 15% extra on jellies, pickles, packed nuts and some biscuits. Those who think that inflation is all 'cost push' and the result of Communist militants may like to reflect on the fact that the Rowntree family is one of the greatest financers of Communist terrorists in Southern Africa besides supporting Britain's Liberal Party.

between the Irish Republic, the U.K. Government and representatives from Northern Ireland resolved to form a Council of Ireland.

Although Northern Ireland will have 'equal' representation with the Irish Republic on the Council, it must be remembered that whereas all the Irish representatives will be Republicans not all the Ulster representatives will be Loyalists. There can be little doubt that this predominantly Republican body will progressively develop as the future government of a united Irish Republic.

Class warfare nonsense

Heath knows that this will be a General Election year. He also knows that the Tory Government could not possibly be re-elected if it had to fight on the strength of its record. Heath has, therefore, abandoned his slogan of 'One Nation' and deliberately provoked and exploited a confrontation with the trades unions.

Heath wants the next General Election to be fought on the thoroughly bogus question of: 'who rules Britain — the Government or the trade unions?' He hopes that with the help of the *Daily Express* and other organs capable of making phoney patriotic appeals he will not only be able to win the next General Election but gain a landslide victory.

The National Front utterly rejects all this class war nonsense. We believe that a British Government should be united with British trade unionists in order to face the real threat to Britain — the growing monopoly of international economic and political power. The latter not only overshadows both the Government and the trade unions, but uses class conflict in order to divide the nation and to divert our attention away from its own sinister activities.

Organisations like the Fabian Society, Political and Economic Planning, the American Council on Foreign Relations—Chatham House complex and the Bilderbergers have been working towards this for many years.

Were Orwell alive today he would be clearly able to distinguish the net that is rapidly closing in around us.

More taxes

One promise that Labour would probably keep is that to make a substantial increase in the level and range of taxation. This will take even more purchasing power out of the hands of the people and concentrate in the usual faceless bureaucracy of so-called experts who think they know how to run our lives better than we do.

Workers' participation fraud

Labour also plans to: "Introduce a capital sharing scheme." This

Anti-Marketeers who have put faith in the Labour Party should note that the latter intends merely to: "Renegotiate the E.E.C. terms." The failure to mention anything about withdrawal should come as no surprise when one considers that the previous Labour Government

Communist trained and controlled black terrorists are already murdering our kith and kin in Rhodesia with the utmost savagery. Support for this kind of thing is a shocking indictment of inhuman callousness. Voters with friends and relations in Southern Africa should bear this in mind when they next go to the polls.

Just what DO the Liberals stand for?

WE KNOW that the Liberal Party is just a collection of opportunists who will give their support to almost any item of domestic trivia in an attempt to gain votes. On the really important issues of the day, however, Liberal Party policies are no different from those of the two major Establishment parties. The Young Liberals, however, are something different.

According to their Chairman, Miss Ruth Addison, the primary aim of the Young Liberals is: "to get rid of capitalism." A Young Liberal policy statement says that it is to be replaced with: "an economic and industrial system under workers' control and ownership." This sounds like the kind of thing that Communist parties always promise (but never put into practice) and points to the growing infiltration of Liberal thought by what can only be described as 'Marxism'.

Other Young Liberal policies include: support for immigrant spongers and more homosexual freedom, the promotion of pupil power, an end to trade with South Africa and Rhodesia, and more trade with the Communist countries of Eastern Europe. The last of these objectives smacks so much of the pro-Moscow Communist Party of Great Britain that one can see the Trotskyites reeling in horror at this latest upsurge of hardline Stalinism!

The Young Liberals have joined the National Union of Students in the use of the Communist clenched fist salute on posters.

Central Fund

The National Front has launched a Central Fund for the purpose of meeting its administrative expenses in the fighting of the next General Election, in which it aims to put up 50 candidates. This fund is not to be confused with local branch funds.

Branch funds will aim to raise the required sum for the fighting of their constituency campaigns, i.e. the placing of candidates' deposits, the printing of their election literature and other general expenses.

The Central Fund is to cover the expense of administering the whole election campaign from headquarters and will include the extension of full time secretarial and organisational staff as its main item.

The Central Fund has been set a target of £10,000 a year for the next two years, starting from the 1st June, 1973.

We urge all supporters of the National Front to give generously so that we may raise the desired figure or at least get a substantial part of the way towards it. Contributions should be addressed to the National Front, 50 Pawns Road, Croydon, CRO 2QF. Cheques or postal orders should be made out to National Front No. 2 account.

THE FRONT LINE

THE NATIONAL FRONT'S ANSWER TO BRITAIN'S TWENTIETH CENTURY CRISIS

OUR CURRENT difficulties are not simply the result of policies carried out over the past five years or even over the past fifty years. They are the result of a whole way of thinking that has guided this country for much longer.

This does not mean to say that we are reactionaries harkening back to some imaginary golden age — far from it. We believe that radical, even revolutionary, changes must be made in order to build a totally new and better society.

This century has seen great technological and social advances. At the same time, however, we have been increasingly drawn under the control of economic and political monopoly. If we do not stand up and fight against this we will inevitably become the slaves of a totalitarian World State in which national identity will be destroyed and in which every aspect of life will be an affront to human dignity.

In opposition to this the National Front believes that a world of nation-states inspired by a sense of social justice and mutual respect offers the most desirable, natural, practical and rational basis for freedom and stability throughout mankind.

At the next General Election the National Front intends to field fifty candidates. The beliefs and aims listed below are those on which we will be fighting.

In the past many people who agreed with us nevertheless declined to actually vote for us on the grounds that they would be wasting their vote. Let us hope that these people have now realised that they have been wasting their vote for as long as they have had one, and that although a vote for the NF may not have any immediate effect in this Election it will at least be helping to prepare the way for an NF victory in the future.

SOCIAL WELFARE

THE National Front acknowledges it is an absolute public obligation to provide adequately for the very young, the very old, the sick and the dis-

questions of private or public ownership, looking at each on its merits and purely from the standpoint of national interest and utility.

Broadly speaking, the NF supports private enterprise as the most dynamic and efficient form of industrial operation; but it advocates

economy, exercised by private financial interests, as the greatest single cause of inflation. It proposes state control of all credit, which will prohibit banks from issuing loans in excess of money on deposit, and grant to the Bank of England — under firm government supervision — sole right to create new credit for the economy, which will take into account yearly increases in actual national wealth measured in goods

internal security. As part of the latter we advocate the rearming of the Royal Ulster Constabulary and the revival of the B Specials.

The NF advocates the use of the death penalty in Northern Ireland for all those guilty of acts of terrorism.

CRIME AND PUNISHMENT

consent of the British people.

Yet he has bulldozed us into Europe in the most undemocratic and unconstitutional way.

The National Front says that British membership of the Common Market is wrong. It means the loss of our independence, dictatorship by the faceless bureaucrats of Brussels, serious damage to our economy, more immigrants, and the ultimate destruction of the British way of life.

A 'BRITISH' COMMONWEALTH

THE National Front believes that Britain's place lies with the white dominions of the British Commonwealth — Australia, New Zealand and Canada; together with the Republics of Rhodesia and South Africa.

The NF supports the fullest political and economic integration that can be made acceptable to the countries concerned.

ECONOMIC NATIONALISM

THE National Front is against international free trade and advocates in its place a policy for Britain of economic nationalism. This means that Britain should strive for the maximum self-sufficiency in vital goods of which her resources are capable. The NF advocates protection of the home market for most manufactured products as an essential basis for national industrial recovery and full employment.

It supports the development of every possible source of domestic raw material under British ownership and control, so as to lessen British dependence on foreign supplies. Notable in this category are the newly found oil resources of the North Sea.

As part of the drive to greater national self-reliance in the economy

national identity will be destroyed and which every aspect of life will be an affront to human dignity.

In opposition to this the National Front believes that a world of nation-states inspired by a sense of social justice and mutual respect offers the most desirable, natural, practical and rational basis for freedom and stability throughout mankind.

At the next General Election the National Front intends to field fifty candidates. The beliefs and aims listed below are those on which we will be fighting.

In the past many people who agreed with us nevertheless declined to actually vote for us on the grounds that they would be wasting their vote. Let us hope that these people have now realised that they have been wasting their vote for as long as they have had one, and that although a vote for the NF may not have any immediate effect in this Election it will at least be helping to prepare the way for an NF victory in the future.

SOCIAL WELFARE

THE National Front acknowledges it is an absolute public obligation to provide adequately for the very young, the very old, the sick and the disabled in terms of accommodation, food, clothing, warmth, health and hygiene services.

According to figures published in the *British Medical Journal* about 50,000 old people die each year in Britain of hypothermia — a dangerously low body temperature. Besides them at least 500,000 suffer from some form of ill-health because of the cold.

The reason for this tragic state of affairs is quite obvious — old age pensioners simply cannot afford to buy enough fuel to keep themselves alive. The fact that successive British Governments have done absolutely nothing about it, besides shedding crocodile tears at election time and making a few token increases in old age pensions, is a shocking example of sheer criminal neglect.

The National Front demands that old age pensions be adequate to meet all basic human needs and that their level should be raised to cover any increase in the cost of living index. We also advocate that in order to ensure adequate warmth in winter, heating services should be provided free of charge up to a certain unit of consumption to all O.A.P.s.

questions of private or public ownership, looking at each on its merits and purely from the standpoint of national interest and utility.

Broadly speaking, the NF supports private enterprise as the most dynamic and efficient form of industrial operation; but it advocates clearly defined limits to the function of private industry and commerce, determined by the national and public good. It utterly rejects *laissez-faire* capitalism of the kind which makes business the master of the nation instead of its servant.

The NF strongly supports the principle of regional aid in Britain, and advocates that all necessary measures be taken to bring the work opportunities and living standards of Britain's regions into a state of equality with one another.

INDUSTRIAL RELATIONS

AS A major step towards solving the nation's recurring industrial crises, the National Front advocates stronger, not weaker, trade unions. Fewer and stronger unions, organised on modern lines, will be better able both to improve representation of their members' interests and withstand unofficial erosion of their authority.

The NF supports in principle the idea of legislation against unofficial strikes and other forms of deliberate industrial disruption, but believes that such legislation as that introduced by the Conservative

National Front marches for Britain

economy, exercised by private financial interests, as the greatest single cause of inflation. It proposes state control of all credit, which will prohibit banks from issuing loans in excess of money on deposit, and grant to the Bank of England — under firm government supervision — sole right to create new credit for the economy, which will take into account yearly increases in actual national wealth measured in goods and services. Under such a system the principle will be followed that what is physically possible for the economy is financially possible too.

As part of this financial policy, the NF advocates firm controls over the investment of British money abroad, which will prevent the current tendency by which financial interests in Britain support Britain's competitors overseas, and which will help to provide the investment in which British industry is sorely lacking.

The NF advocates the cancellation of the National Debt and foreign debts incurred through inflationary credit creation by international banking houses. This does not of course prejudice the nation's obligations towards the ordinary small saver and bond-holder.

IMMIGRATION

THE Conservatives promised to deal with the immigration problem at the last general election, yet they have broken EVERY SINGLE PROMISE they made on Immigration.

The Ugandan Asian scandal may have been the last straw for the British people, but it is only the beginning for the Government. Up to two million "British" passport

internal security. As part of the latter we advocate the rearming of the Royal Ulster Constabulary and the revival of the B Specials.

The NF advocates the use of the death penalty in Northern Ireland for all those guilty of acts of terrorism.

CRIME AND PUNISHMENT

THE National Front is strongly opposed to recent 'liberal' tendencies in the administration of the law which attempt to upgrade 'social', at the expense of individual, responsibility for wrongdoing and which often result in ludicrously inadequate punishment for the worst types of crimes.

The NF holds that social necessity should be the determining factor in fitting punishment to crime, and that, where it has been proved necessary as a deterrent, Capital Punishment should be restored for certain types of offences.

ECONOMIC NATIONALISM

THE National Front is against international free trade and advocates in its place a policy for Britain of economic nationalism. This means that Britain should strive for the maximum self-sufficiency in vital goods of which her resources are capable. The NF advocates protection of the home market for most manufactured products as an essential basis for national industrial recovery and full employment.

It supports the development of every possible source of domestic raw material under British ownership and control, so as to lessen British dependence on foreign supplies. Notable in this category are the newly found oil resources of the North Sea.

As part of the drive to greater national self-reliance in the economy the NF advocates the expansion of British agriculture so as to enable Britain to supply the greatest possible proportion of her own food.

As with natural resources, so is the NF strongly opposed to large scale foreign ownership of British manufacturing industry, and advocates firm controls to ensure that foreign investment never accounts for more than a small fraction of the share in any major section of the British economy.

For Britain's overseas trade, the NF looks first and foremost to the nations of the British Commonwealth, linked to us by common and complementary economic interests as well as other ties. The NF advocates that Britain do everything possible to rebuild the Commonwealth trading partnership and restore Commonwealth preference.

This is why the National Front has come into being. The National Front was formed in 1967 as a political movement which seeks to come to power through the existing structure of the British Constitution. It seeks the implementation of a programme of Nationalism in order to secure the future of Great Britain

Immigrant landlord tries to poison baby

MR. ANWAR Khan, an immigrant and Rachman-style landlord, put Ajax in the powdered milk of his tenant's nine-month-old baby.

This came at the end of a long line of harassment that included cutting off gas, water and electricity, removing a window from the child's room and locks on doors, and brandishing a knife in front of the tenant's wife.

Mr. Khan has not yet found himself in court. His tenant, however, found himself before magistrates at Stoke on Trent for hitting Mr. Khan on the nose. Pleading guilty to assault he was given a conditional discharge.

Mr. Khan is reported to be leaving the country. Much as we wish to see the repatriation of all coloured immigrants we feel that just allowing Mr. Khan to go is setting a bad precedent for immigrants who might attempt to commit murder or inflict grievous bodily harm in the future.

Just ONE of the victims

The New Colonialism: A case in point

THE Establishment has recently made a big celebration of the visit of Zaire's black President to Britain. Here Mike Lobb takes a closer look at the man and his country and places them in the context of international power politics.

IF anyone has any doubts about the hollowness of 'African nationalism' then they ought to look at what is happening in the African state of Zaire (formerly known as the Belgian Congo).

There has been a drive to 'Africanise' names, in a campaign designed to establish national 'authority'. President Joseph Desire Mobutu has taken the name of Mobutu Sese Seko, which roughly translated means "the cock that leaves no hen intact" and decreed that all Zairians discard their Christian names in favour of 'authentic' African ones.

Leopoldville is called 'Kinshasa', Elizabethville is 'Lumumbashi' and the former Stanleyville is now 'Kisangani'; other towns have also been renamed.

Yet this 'nationalism' exists only in such harmless forms. Behind the facade, foreign capitalists have been invited in to plunder the country's natural resources. Happy that Mobutu's unchallenged dictatorial powers give Zaire peace and relative stability, foreign investors are putting in money on a rising scale. A new copper mine is being opened by a Japanese mining group in Katanga and an international consortium has discovered what may be the richest bed of copper in the world.

national companies presently engaged in robbing the Third World, are all based in the West. Not only does the Western taxpayer fork out an enforced tribute to International Capitalism by way of 'foreign aid' he pays in other ways too...

The International Capitalist system is centred around the banks. Banks control the economies of Western countries, directly by holdings in industry, and indirectly by their control over currency, credit and trade.

Just as the Third World is made 'under-capitalised' so is the West made 'over-capitalised' by inflation and remitted interest on overseas investments. Over-capitalisation means 'expansion' and particularly, an expansion in job opportunities in relation to labour availability. This places labour in a strong bargaining position.

The answer of International Capitalism to this problem is twofold. Firstly, where capital is plentiful and labour scarce — fresh immigrant labour is imported. Witness the flood of Afro-Asians and West Indians to Britain, and Spanish, Yugoslav, Turkish and Italian workers to West Germany.

Secondly, where labour is plentiful and capital scarce — capital is invested, provided that the government of the recipient country is a 'stable' one. This explains Western investment in the Third World, and in the Soviet Communist bloc where no free trade unions are allowed. Goods produced in these countries by cheap labour, are then flooded back into Western countries to compete with home-produced articles. As the home-produced products are high priced due to high labour costs, they cannot compete with the imported items. Home manufacturers find it difficult to sell their goods, cut back on production and cause unemployment and a fall in the general level of real wages. Western workers are thereby exploited by International Capitalism which uses foreign labour against them both at home and abroad.

Russia: 'millions were murdered'

In his latest book to be published in the West, *The Gulag Archipelago*, Alexander Solzhenitsyn confirms that millions of people have been murdered in Russia since the Revolution in 1917. His figures show that more people were put to death in only the first two years of Bolshevik rule than were executed under the Czars during the whole of the previous century.

As the Soviet regime tightened its hold the number of deaths increased. During the purge of 1937 over half a million 'political offenders' were killed. Millions more have died in prison camps from brutal treatment, cold, disease and exhaustion.

Mr. Khan has not yet found himself in court. His tenant, however, found himself before magistrates at Stoke on Trent for hitting Mr. Khan on the nose. Pleading guilty to assault he was given a conditional discharge.

Mr. Khan is reported to be leaving the country. Much as we wish to see the repatriation of all coloured immigrants we feel that just allowing Mr. Khan to go is setting a bad precedent for immigrants who might attempt to commit murder or inflict grievous bodily harm in the future.

Just ONE of the victims

15-year-old Patricia McCann was walking home after spending the evening with a friend. As she passed the Trafalgar Tavern, Greenwich, she was attacked by three coloured girls who plunged a broken bottle into her face and robbed her of her purse.

Leopoldville is called 'Kinshasa', Elizabethville is 'Lumumbashi' and the former Stanleyville is now 'Kisangani'; other towns have also been renamed.

Yet this 'nationalism' exists only in such harmless forms. Behind the facade, foreign capitalists have been invited in to plunder the country's natural resources. Happy that Mobutu's unchallenged dictatorial powers give Zaire peace and relative stability, foreign investors are putting in money on a rising scale. A new copper mine is being opened by a Japanese mining group in Katanga and an international consortium has discovered what may be the richest bed of copper in the world.

In the capital, four car manufacturers are planning to open up assembly plants. Goodyear has finished a \$16.8 million tyre factory, an aluminium plant is in the planning stage and a steel mill is underway.

What is most significant is that nearly all investors come in on the understanding that they will be able to recover their full investment within three years, which means that in four years they will have taken out of the country more than they put into it.

THE TRUTH ABOUT 'AID'

Zaire will remain 'under-developed', or rather 'under-capitalised', as interest debt on invested capital sucks wealth out of the country. 'Foreign Aid' will be called for, and this will come from the Western World taxpayers, who will be told that they are 'helping Africans' by handing out money gifts. In fact, all such 'aid' does is to bolster up the system of exploitation in the Third World by cushioning its worst effects. A small part of the 'aid' money will go to the native cronies of International Capitalism, but most of it will flow back to the owners and controllers of the International Capitalist financial and industrial complexes in the

Who are they kidding?

ACCORDING to the official 1971 Census Birmingham and the ten other West Midlands towns of Wolverhampton, Warley, Walsall, West Bromwich, Dudley, Halesowen, Stourbridge, Sutton Coldfield, Solihull and Aldridge-Brownhills only have 142,638 people whose parents were born in the New Commonwealth. This amounts to a coloured immigrant descended population of just 6%.

Anyone who has been brought up in the West Midlands conurbation and has seen the 'Black Country' take on a sinister new meaning, must be more than a little surprised to learn that there are supposed to be so few immigrants. One only has to drive down the main road from Birmingham Station to West Bromwich, for example, to see an area that is predominantly coloured.

One explanation for these ridiculously low figures is that there are so many illegal or illiterate immigrants that they either totally failed to fill in census forms at all or that they filled them in wrongly. Alternatively the Government are still cooking the books. Perhaps the most realistic explanation is a combination of the two.

The London figures, which were made available in October, revealed some rather more realistic figures: Haringey 18%, Brent 17%, Hackney 15%, Islington and Lambeth 13% and Ealing 12%. Even these totals are woefully underestimated and give no idea of concentration in more localised areas such as Southall where the number of immigrant births is greater than the number of white births.
